

MPT510 - WiFi

802.11 WiFi portable Chip & PIN payment terminal

The MPT510 portable payment terminal is designed for merchants who have a requirement to take card payments within the proximity of a wireless network. Utilising robust and secure 802.11 WiFi infrastructure, the MPT510 is ideally suited to "pay at table" within the hospitality sector. Thyron's products include both stand-alone solutions and payment solutions which are integrated into third party EPOS systems.

Key features of the MPT510 include:

- Standalone or integrated solutions
- Optional Integrated Contactless Technology
- Optional web-based transaction reporting
- Integrated secure PIN Entry Device - Chip & PIN certified
- 32bit ARM processor
- Smart battery technology
- Easy load printer
- Charging cradle
